Agency Description: Private practice providing outpatient neuropsychological consultation and evaluation for children, adolescents, and adults with a variety of neurobehavioral disorders.

Agency Mission /Objective: In addition to our mission of providing high quality clinical neuropsychological services throughout southern California, we are committed to the training and education of clinicians interested in pursuing careers in clinical neuropsychology.

Theoretical Orientation: Eclectic, Neuropsychology, Developmental, Lifespan Approach

Population: Pediatric Track - children, adolescents, and young adults with a variety of neurobehavioral disorders

Adult/Gero Track - adults through seniors with a wide range of central nervous system disorders, including traumatic brain injury, dementia, stroke, and movement disorders.

Staff: Please list number of staff by degree/professional licenses

4 - Psychologists

Training and Education: Our pediatric and adult tracks place a primary emphasis on developing the emerging clinician's independent practitioner skills in a manner that adheres to current standards in clinical neuropsychology. Our goal is to provide trainees with an experience that reflects as closely as possible the APA Division 40 Guidelines for Postdoctoral Training in Clinical Neuropsychology (1987), the APA guidelines from the National Conference on Postdoctoral Training in Professional Psychology(1993), and the Houston Conference on Specialty Education and Training in Clinical Neuropsychology(1998). Additionally, the residency program strives to provide trainees with experiences required to meet eligibility requirements for the ABPP Diploma in Clinical Neuropsychology through the American Board of Clinical Neuropsychology.

X- Cultural Training: A core feature of the training program is emphasizing an understanding of ethical practice and awareness/recognition of issues of cultural and individual diversity that are relevant to provision of neuropsychological services. Increased understanding of cultural and individual diversity is provided through specific lectures addressing these topics in the mandatory rounds/seminar, as well as through individual supervision sessions and mandatory readings. Our program locations in 2 major metropolitan areas (San Diego and Orange County) provide fellows with the opportunity to work with a widely diverse population in terms of ethnic and cultural diversity.

PostDoc Responsibilities: Approximately 70% of the resident's time is spent in the delivery of clinical services. Educational/didactic and research experiences comprise the other 30% of the resident's time.

Prerequisites: Candidates for the postdoctoral residency program must have completed all requirements for their doctoral degree prior to beginning the residency. They shall have completed a predoctoral internship accredited by the American/Canadian Psychological Association. Only graduates of programs accredited by the American/Canadian Psychological Association will be considered. Candidates for postdoctoral residency should have well-established clinical and research interests in neuropsychology.

Application Procedures: Candidates for the postdoctoral residency program must have completed all requirements for their doctoral degree prior to beginning the residency. They shall have completed a predoctoral internship accredited by the American/Canadian Psychological Association. Only graduates of programs accredited by the American/Canadian Psychological Association will be considered. Candidates for postdoctoral residency should have well-established clinical and research interests in neuropsychology.

Application Deadline: January

Number of Applicants last year: 15

Additional Comments: Our program participates in the APPCN Resident Matching Program (<http://www.appcn.org>), and all applicants for this position must register with the National Matching Service. Our Program Code Number is: 8273.
